

Architectural Panel Guide

Colors on this card are best-approximations of the true finish colors of our products. Though they are as accurate as technology allows, there will be slight differences compared to actual product finishes. More information about our paint systems is available at nuraymetals.com.

Color availability in Nu-Ray's Cool Kynar® PVDF finishes is shown by gauge under each color chip below. 24 gauge panels available with our proprietary Ocean Guard™ coating are marked with this symbol: . Real Copper is not painted.
